Testing

Unit Level Testing

Rules:

1. Button should be clickable.
2. Button should redirect to the correct page.

Test Case : Home Button V1.0

Test Data	Expected Results	Actual Results	Pass/Fail
The User clicks on “Home” button	Page should be jumped to Home page	Page has been jumped to Home page	Pass

Test Case : Gallery Button V1.0

Test Data	Expected Results	Actual Results	Pass/Fail
The User clicks on “Gallery” button	Page should be jumped to Car List	Page has been jumped to Car List	Pass

Test Case : Login Button V1.0

Test Data	Expected Results	Actual Results	Pass/Fail
The User clicks on “Login” button	Page should be jumped to Login dashboard	Page has been jumped to Login dashboard	Pass

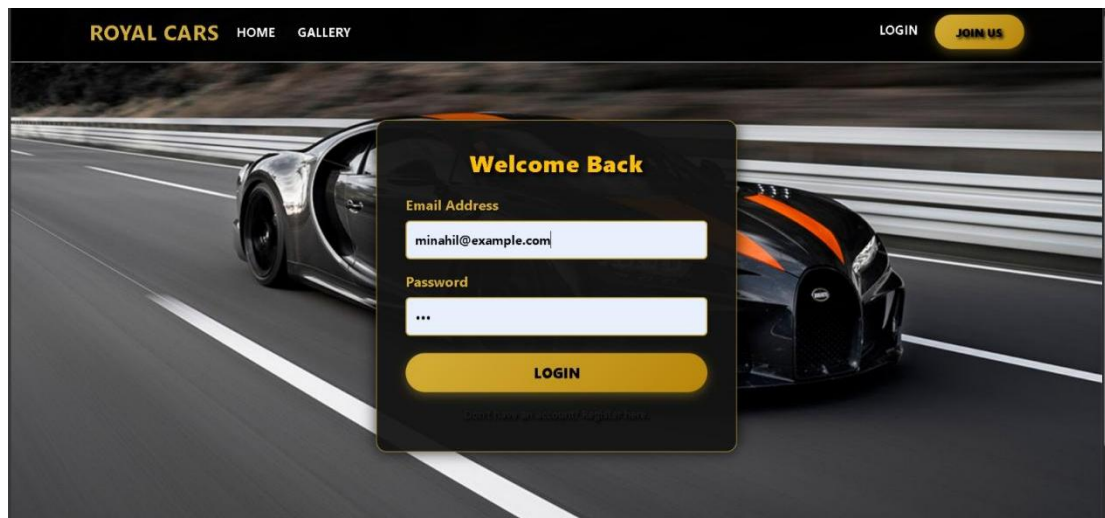

Test Case : Join Us Button V1.0

Test Data	Expected Results	Actual Results	Pass/Fail
The User clicks on “Join us” button	Page should be jumped to Registration dashboard	Page has been jumped to Registration dashboard	Pass

Test Case : Logo V1.0

Test Data	Expected Results	Actual Results	Pass/Fail
The User clicks on “Logo” button	Page should be jumped to Home page	Page has been jumped to Home page	Pass

Login page

Rules:

1. Email field must not be empty.
2. Email must follow valid format (example@domain.com).
3. Invalid email format should be rejected with an error message
4. Password field must not be empty.
5. Password should meet minimum security requirements.
6. Empty or invalid password should not allow login.
7. Button should be clickable. Button should redirect to the correct page.

Test Case : Email V1.0

Test Data	Expected Results	Actual Results	Pass/Fail
(empty)	Should be rejected	Has been accepted	Fail
SE123	Should be rejected	Has been rejected	Pass
se123@	Should be rejected	Has been rejected	Pass
se123@.	Should be rejected	Has been rejected	Pass
se123com	Should be rejected	Has been accepted	Fail
se123@.com	Should be accepted	Has been accepted	Pass

Test Case : Email V1.1

Test Data	Expected Results	Actual Results	Pass/Fail
(empty)	Should be rejected	Has been rejected	Pass
SE123	Should be rejected	Has been rejected	Pass

se123@	Should be rejected	Has been rejected	Pass
se123@.	Should be rejected	Has been rejected	Pass
se123com	Should be rejected	Has been rejected	Pass
se123@.com	Should be accepted	Has been accepted	Pass

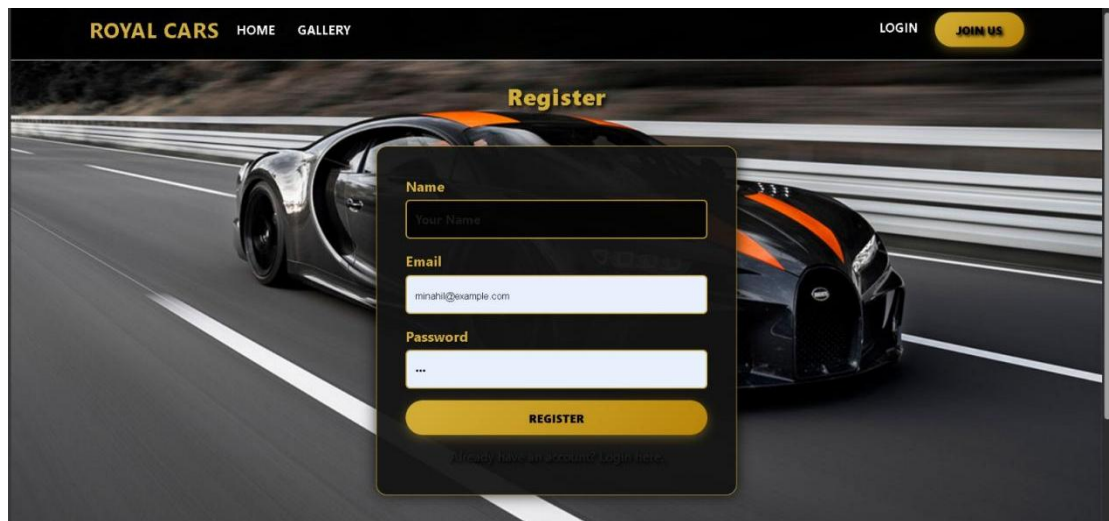

Test Case : Password V1.0

Test Data	Expected Results	Actual Results	Pass/Fail
(empty)	Should be rejected	Has been rejected	Pass
se123	Should be accepted	Has been accepted	Pass

Test Case : Login Button V1.0

Test Data	Expected Results	Actual Results	Pass/Fail
The User clicks on "login" button	Page should be jumped to respective dashboard	Page has been jumped to Respective dashboard	Pass

Registration page

Rules:

1. Name field must not be empty.
2. Name should contain valid characters only.
3. Invalid or empty name should display validation error.
4. Email must be in valid format.
5. Email must be unique in the system.
6. Duplicate or invalid email should be rejected.
7. Email must be in valid format.
8. Email must be unique in the system.
9. Duplicate or invalid email should be rejected.
10. Password must contain at least 8 characters.
11. Password should include alphabets and numeric values.
12. Empty password should not be accepted.
13. Button should be clickable.
14. Button should redirect to the correct page.

Test Case : Name V1.0

Test Data	Expected Results	Actual Results	Pass/Fail
(empty)	Should be rejected	Has been accepted	Fail
se123	Should be accepted	Has been accepted	Pass

Test Case : Name V1.1

Test Data	Expected Results	Actual Results	Pass/Fail
(empty)	Should be rejected	Has been rejected	Pass
se123	Should be accepted	Has been accepted	Pass

Test Case : Email V1.0

Test Data	Expected Results	Actual Results	Pass/Fail
(empty)	Should be rejected	Has been accepted	Fail
SE123	Should be rejected	Has been rejected	Pass
se123@	Should be rejected	Has been rejected	Pass
se123@.	Should be rejected	Has been rejected	Pass
se123com	Should be rejected	Has been accepted	Fail
se123@.com	Should be accepted	Has been accepted	Pass

Test Case : Email V1.1

Test Data	Expected Results	Actual Results	Pass/Fail
(empty)	Should be rejected	Has been rejected	Pass
SE123	Should be rejected	Has been rejected	Pass
se123@	Should be rejected	Has been rejected	Pass
se123@.	Should be rejected	Has been rejected	Pass
se123com	Should be rejected	Has been rejected	Pass
se123@.com	Should be accepted	Has been accepted	Pass

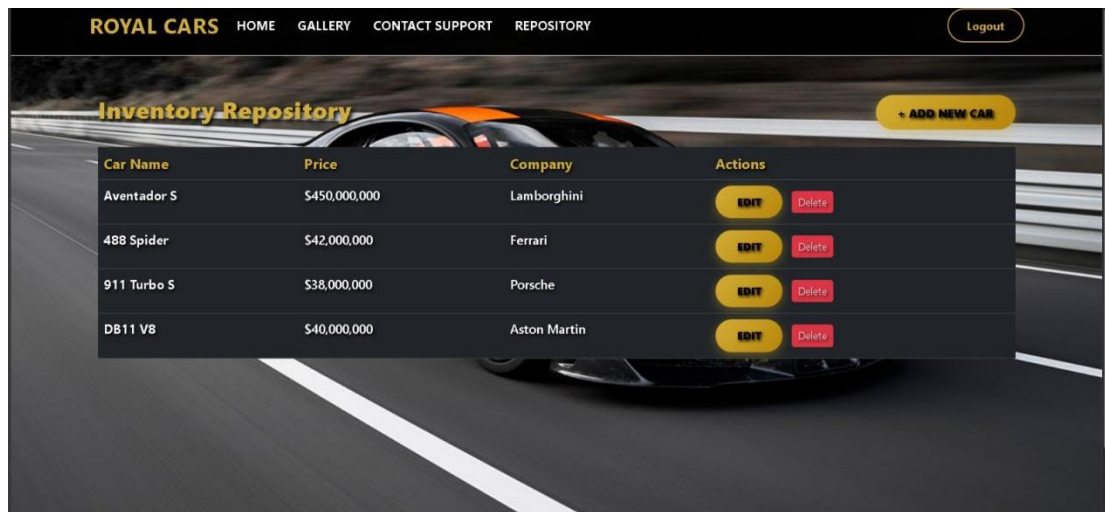

Test Case : Password V1.0

Test Data	Expected Results	Actual Results	Pass/Fail
(empty)	Should be rejected	Has been rejected	Pass
se123	Should be accepted	Has been accepted	Pass

Test Case : Register Button V1.0

Test Data	Expected Results	Actual Results	Pass/Fail
The User clicks on "Register" button	Credentials will be saved in database	Credentials are saved in database	Pass

Admin Dashboard

Rules:

1. Button should be clickable.
2. Button should redirect to the correct page.

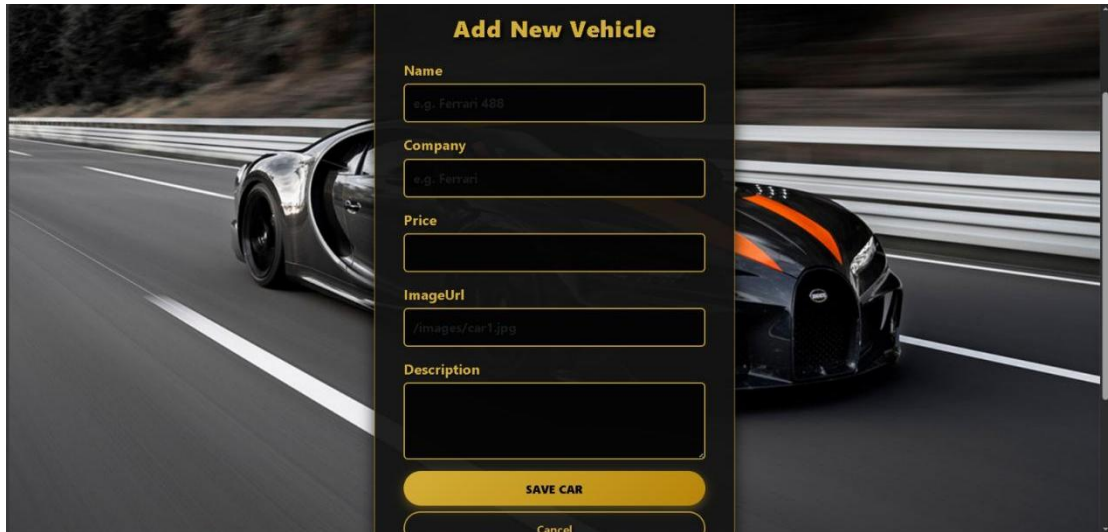

Test Case : Admin Logout Button V1.0

Test Data	Expected Results	Actual Results	Pass/Fail
The User clicks on "Logout" button	User will jump to login page	User has not jumped to login page	Fail

Test Case : Admin Logout Button V1.1

Test Data	Expected Results	Actual Results	Pass/Fail
The User clicks on "Logout" button	User will jump to login page	User has jumped to login page	Pass

Add Car

The screenshot shows a dark-themed 'Add New Vehicle' form. The form has a title 'Add New Vehicle' in yellow. It contains five input fields: 'Name' (with placeholder 'e.g. Ferrari 488'), 'Company' (with placeholder 'e.g. Ferrari'), 'Price' (empty), 'ImageUrl' (with placeholder 'images/car1.jpg'), and 'Description' (empty). Below the fields is a yellow 'SAVE CAR' button and a 'Cancel' button. The background is a blurred image of a car on a road.

Rules:

3. Car name must not be empty.
4. Car name should contain valid text only.
5. Empty or invalid input should be rejected.
6. Company name must not be empty.
7. Company name should contain valid characters.
8. Invalid company name should show error.
9. Price must be numeric.
10. Price must be greater than zero.
11. Negative or non-numeric values should be rejected.
12. URL field must not be empty.
13. Description must not be empty.
14. Description should contain readable text.
15. Empty description should show validation error.
16. Button should be clickable.
17. Button should redirect to the correct page.

Test Case : Car Name V1.0

Test Data	Expected Results	Actual Results	Pass/Fail
(empty)	Should be rejected	Has been accepted	Fail
Mercedes	Should be accepted	Has been accepted	Pass

Test Case : Car Name V1.1

Test Data	Expected Results	Actual Results	Pass/Fail
(empty)	Should be rejected	Has been rejected	Pass
Mercedes	Should be accepted	Has been accepted	Pass

Test Case : Company V1.0

Test Data	Expected Results	Actual Results	Pass/Fail
(empty)	Should be rejected	Has been rejected	Pass
Toyata	Should be accepted	Has been accepted	Pass

Test Case : Price V1.0

Test Data	Expected Results	Actual Results	Pass/Fail
(empty)	Should be rejected	Has been rejected	Pass
-1000000	Should be rejected	Has been accepted	Fail
wry	Should be rejected	Has been rejected	Pass
Wer123	Should be rejected	Has been accepted	Fail

Integration Level Testing

1. User Register V.1.0

Test Case ID	Test Case Description	Expected Results	Actual Results	Pass/Fail
INT_1	User enter correct credentials	User account should be created	As Expected	Pass
INT_2	User fails to register with invalid credentials	Error message "Invalid credentials" displayed	As Expected	Pass
INT_3	User registers with existing credentials	Error message displayed	As Expected	Pass

2. User Login V.1.0

Test Case ID	Test Case Description	Expected Results	Actual Results	Pass/Fail
INT_4	User login successfully with valid credentials	User is directed to respective dashboard	As Expected	Pass
INT_5	User fails to login with invalid credentials	Error message "Invalid credentials" displayed	As Expected	Pass
INT_6	Admin logs with valid admin credentials	Admin dashboard is displayed	As Expected	Pass
INT_7	Support Reviewer logs with his valid credentials	Support Reviewer dashboard is displayed	As Expected	Pass

3. Car Management V.1.0

Test Case ID	Test Case Description	Expected Results	Actual Results	Pass/Fail
INT_8	Admin adds a new car	Car added successfully	As Expected	Pass
INT_9	Admin edits a car	Car updated successfully	As Expected	Pass
INT_10	Admin deletes a car	Car deleted successfully	As Expected	Pass

4. Buy Car V.1.0

Test Case ID	Test Case Description	Expected Results	Actual Results	Pass/Fail
INT_10	Customer clicks Buy button	Order form displayed	As Expected	Pass
INT_11	Customer enters valid information	System accepts the information	As Expected	Pass
INT_12	Customer clicks “confirm order” button	Confirmation message displayed	As Expected	Pass

5. Submit Queries V.1.0

Test Case ID	Test Case Description	Expected Results	Actual Results	Pass/Fail
INT_13	Customer clicks “Contact Support” button	Query dashboard displayed	As Expected	Pass
INT_14	Customer submits query	Query stored successfully	As Expected	Pass

6. View Queries V.1.0

Test Case ID	Test Case Description	Expected Results	Actual Results	Pass/Fail
INT_15	Support logs in and views queries	Queries displayed	As Expected	Pass

7. Session Management V.1.0

Test Case ID	Test Case Description	Expected Results	Actual Results	Pass/Fail
INT_16	User Logout	Session ends and login page displayed	As Expected	Pass
INT_17	Session timeout	When the user closes the system session will be end	As Expected	Pass

System Level Testing

1. Test Admin Functionality

Test Case ID	SCMS_001	Test Case Description	Test admin login , add , edit and delete car
---------------------	----------	------------------------------	--

Created by	Minahil Khalid	Reviewed by	Dr. Zeeshan	version	1.0
-------------------	----------------	--------------------	-------------	----------------	-----

QA Tester's Log	NULL
------------------------	------

Tester's name	Rohma shahid	Date Tested	03-01-2026	Test Case (Pass/Fail/ Not Executed / Suspended)	Pass
----------------------	--------------	--------------------	------------	--	------

S#	Prerequisites:
1.	Access to Chrome Browser
2.	Internet Should be available.

S#	Test Data:
1.	Username=admin
2.	Password=1234
3.	Email=admin@example.com
4.	Button test = ➤ Login button ➤ Add button ➤ Update button ➤ Delete button ➤ Logout button
5.	Car name = Ferrari f8
6.	Company name =Ferrari
7.	Price = 100000000
8.	Image URL =
9.	Description = This car is the latest model of Ferarri company
10.	Updated price = 20000000

Test Scenario	Verify for entering the valid admin credentials , add car with valid details , edit car and delete car
----------------------	--
